

SUPPLEMENT TO THE USER MANUAL

05 Assembly & Preparation for use | Never step on the Powerbox outside the water!

The Powerbox is designed for mechanical loads on the water. Incorrect handling of the Powerbox can lead to material damage. Therefore:

ATTENTION!

- Never step on the Powerbox when it is outside the water, this can lead to cracks and other irreparable damages which are not covered by the warranty.
- Do not load any additional weight on top of the Powerbox when it is outside the water.
- Do not use the Powerbox for practical training (takeoff etc.) while it is outside the water.

08 Troubleshooting | red-orange-green flashing lights at the wireless remote

Control light on the wireless remote flashes alternately red, orange and green, the jetboard shuts down or doesn't start.

Possible cause

- a) The system detects an increase in moisture

Remedial action

- a) Replace the dryer cartridge
- b) If the malfunction is not rectified by drying, contact your Lampuga dealer
